RESPONSE TO RESTRICTION REQUIREMENT

SIR:

In response to the Office Action dated September 20, 2005, restricting the claims into 16 groups, applicants elect Group I, claims 1-15, 38, 74-81 with traverse.

Applicants consider Group I and Group XV, claim 108, to form a single general inventive concept usable together.

The Office Action considered these two groups to be independent and patentably distinct. It is argued that claim 108 includes a diffraction grating curved surface having a curved surface

84083932\_1

formed in a convex shape whose light irradiated side bulges out, which is not required by the claims in group 1.

However applicants respectfully submit if a difference between the angles that each adjacent two diffraction grating surfaces form with a predetermined reference plane is brought to an infinitesimal value, the SPR sensor chip according to Group I may include the one according to Group XV. Therefore the inventions as claimed are not independent because there is a disclosed relationship between the inventions, that is, they are connected in design, operation, and effect. In addition it is submitted that there would not be a serious burden on the examiner if restriction is not required.

Reconsideration and withdrawal of the restriction with regard to group I and group XV is requested.

Any fee due with this paper may be charged to Deposit Account 50-1290.

Respectfully submitted,

  
Brian S. Myers
